

# Alef - Bais Train

By Channah Goldblatt

**Grade Level:** Early Childhood, Elementary

**Description:**

This bright aleph bais train features block alef – bais letters on brightly colored cars with detachable script letters and gematriya numbers. Use it to brighten up your classroom and to expose your students to print and script alef - bais letters along with their gematriyos. Note: Letters with dots such as bais and kaf are not included. Available in editable Publisher or non-editable pdf format. Also available as a blank train without any letters.

**Goals/Objectives:**

Students will be able to match the Hebrew block letter with its script and gematriya counterpart.

**Materials Needed:**

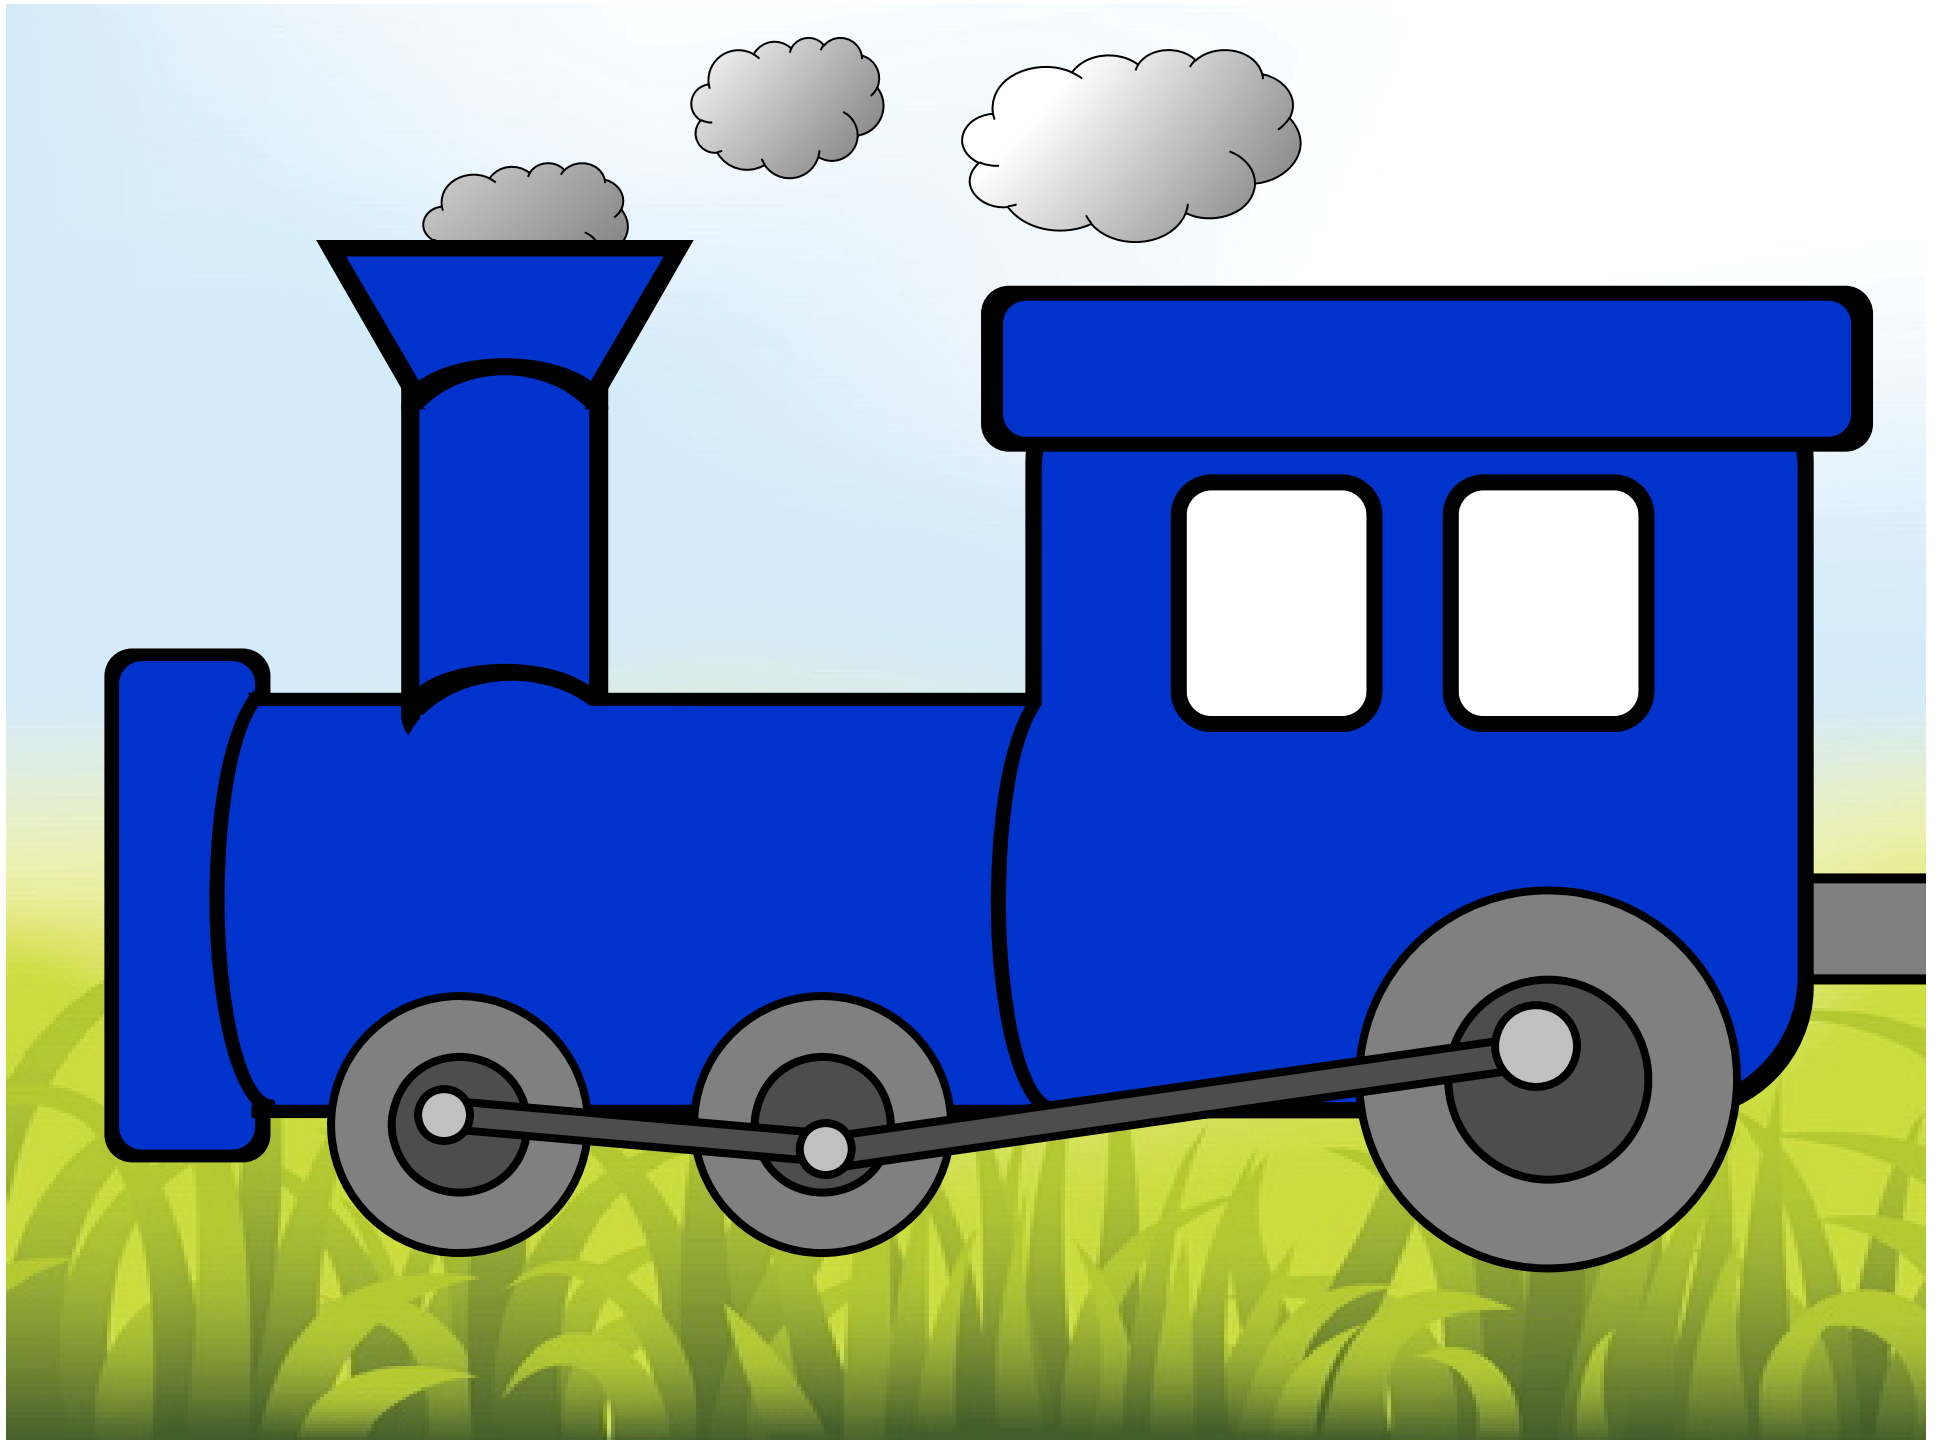

- Color printer
- Laminating machine
- Sticky back Velcro

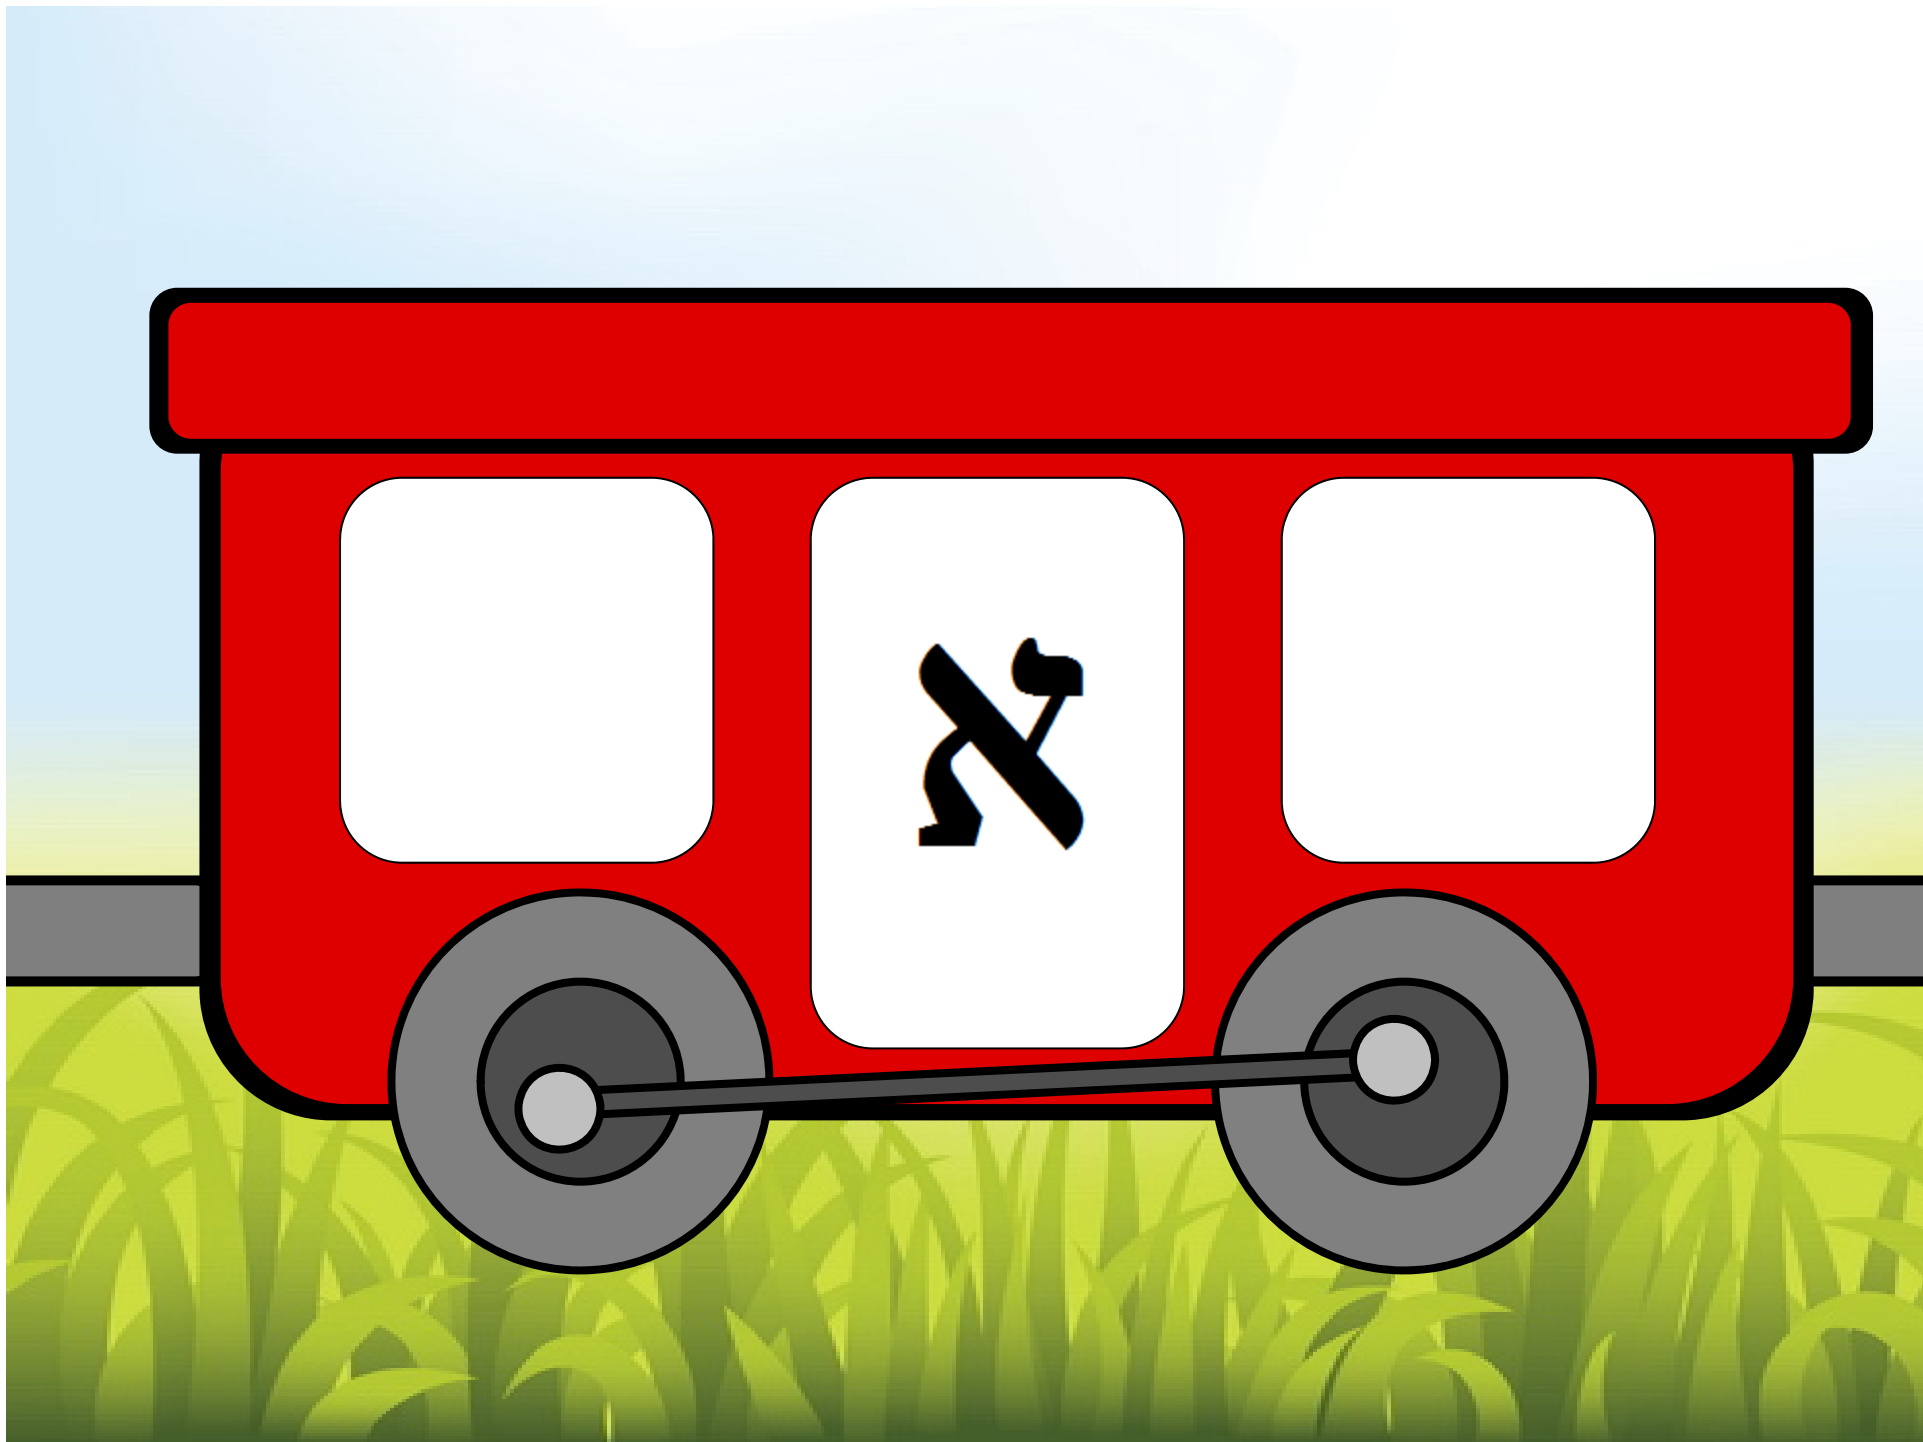

**Instructions:**

1. Print and laminate this display to put on your classroom wall.
2. Cut out the included script letters and gematriya numbers and place Velcro the back of them.
3. Put Velcro in the windows of the carriages and voila, you have an interactive display where the children can review the letters by putting the numbers and letters into the correct carriages.

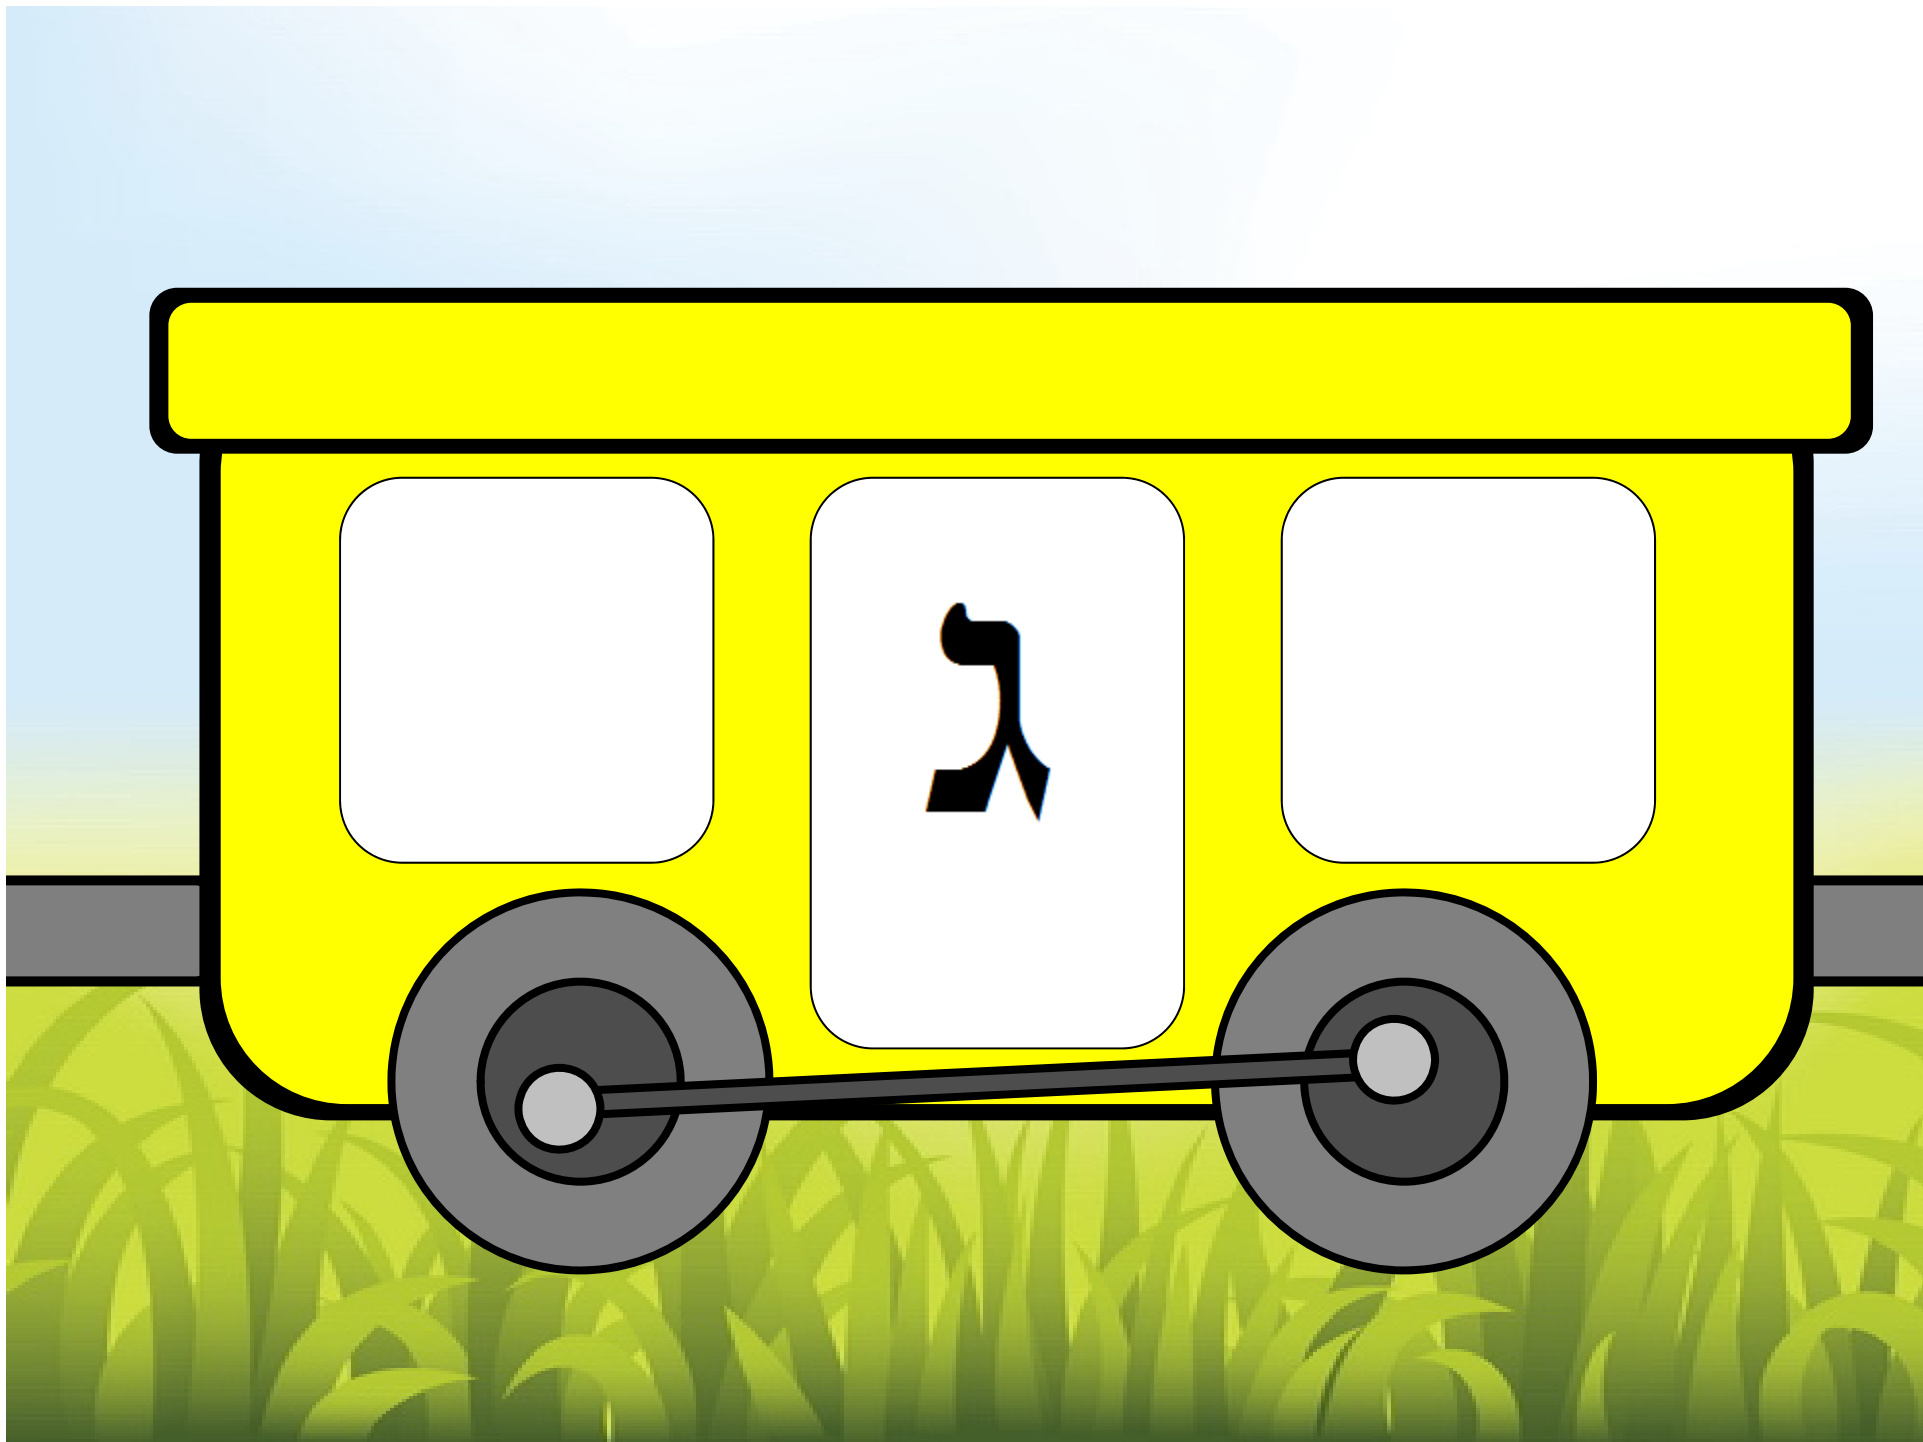

**Additional Tips:**

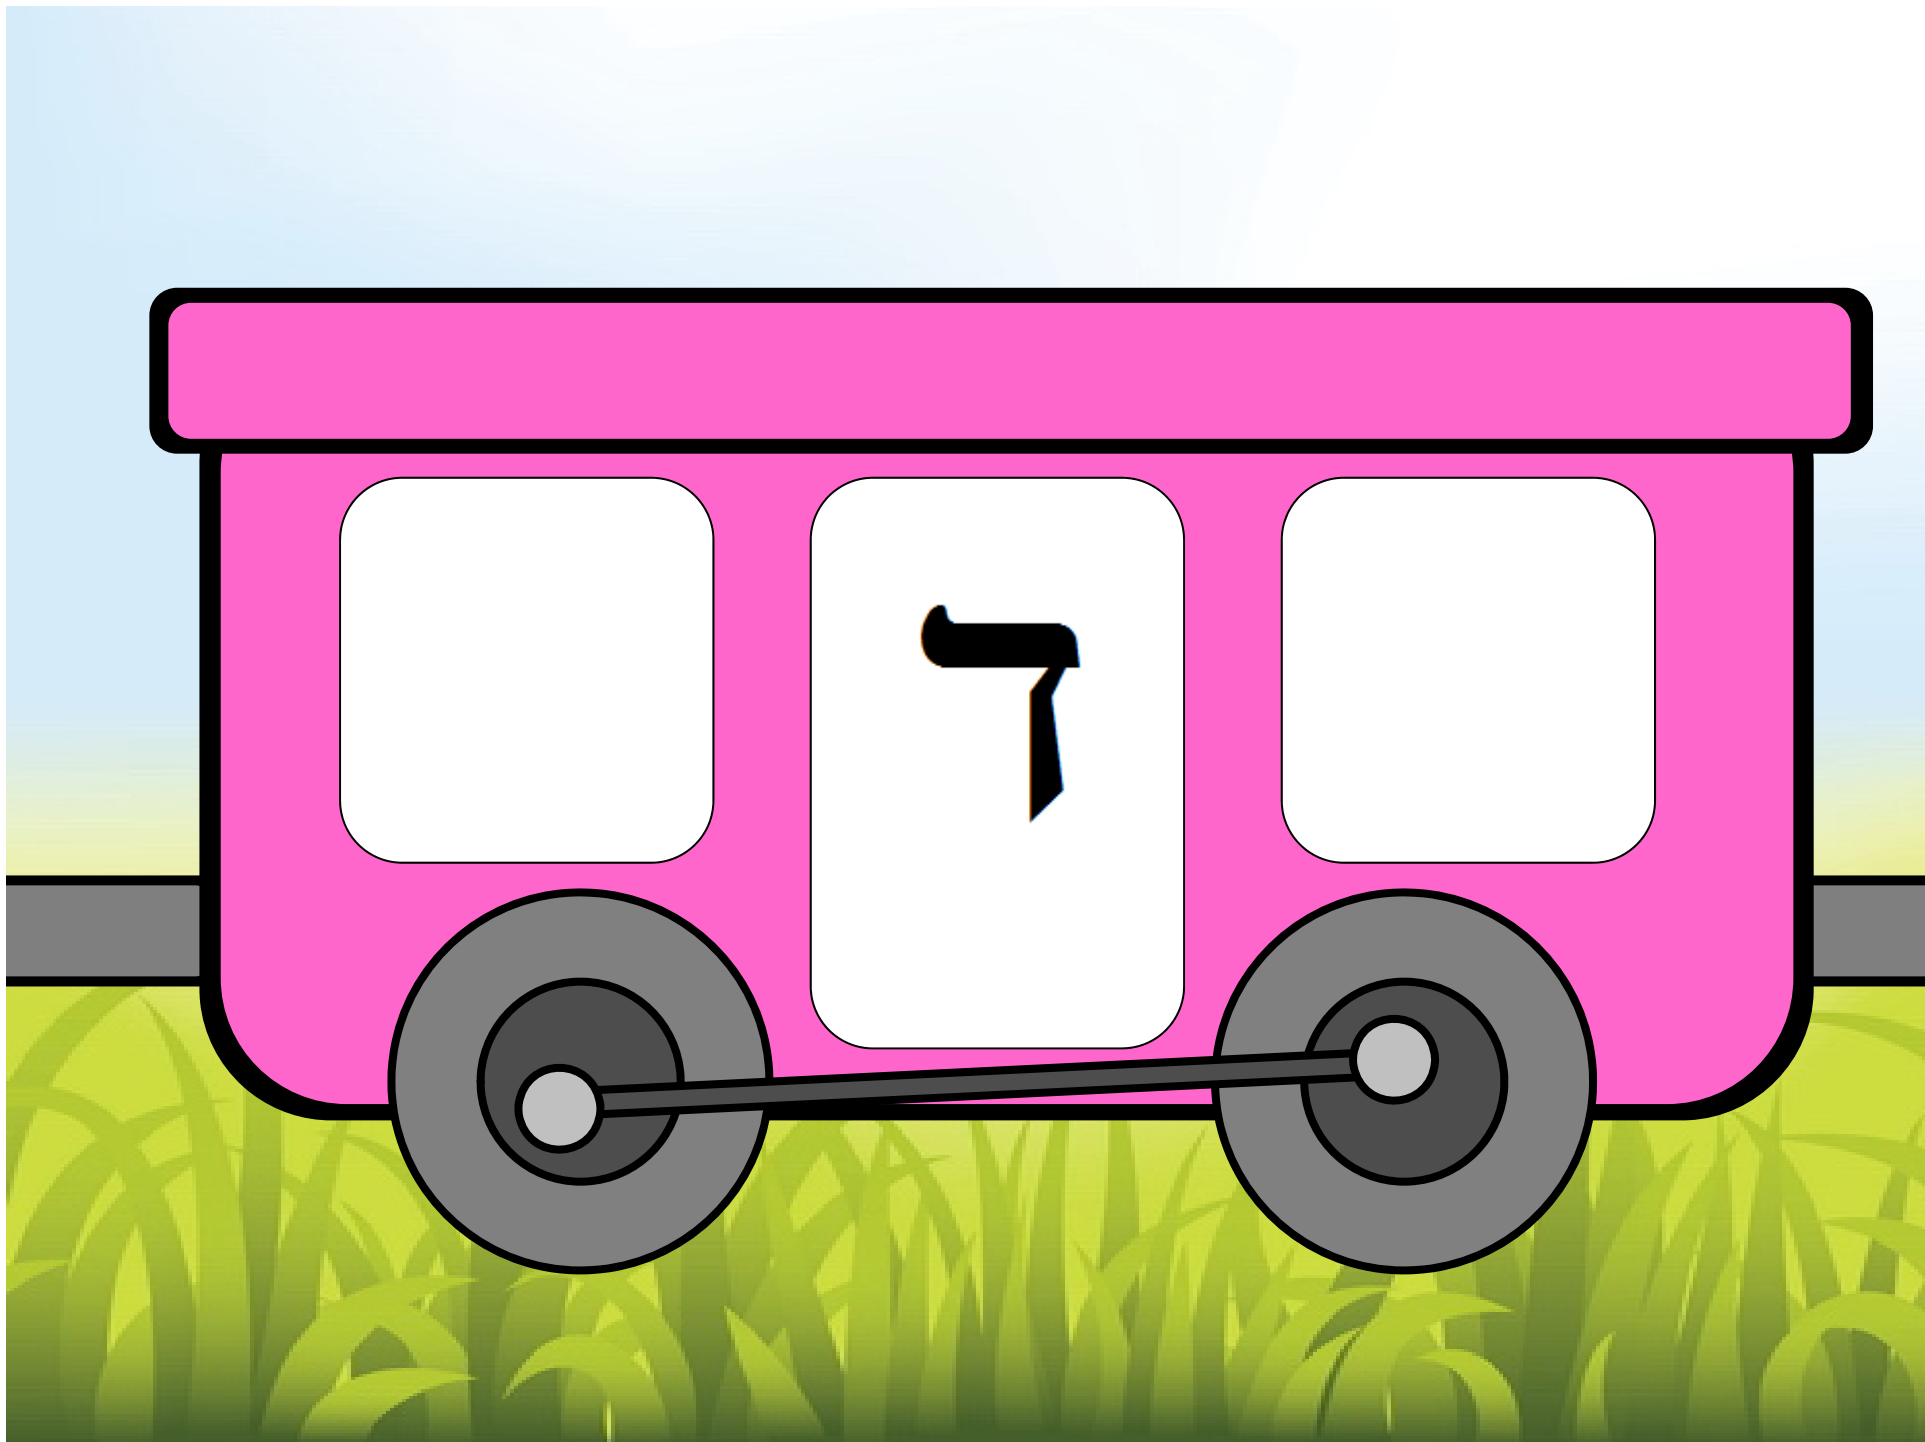

Writing the correct matches to the script letters and gematriyos someplace inconspicuous on the cards makes this game self-checking.
